

# Aberdeen Global - Select Euro High Yield Bond Fund

Class A - 2 Acc

Performance Data and Analytics to 30 April 2017

## Summary investment objective

To achieve a combination of income and growth by investing mostly in bonds (which are like loans that can pay a fixed or variable interest rate) priced in Euro and issued by companies or governments. The bonds will typically have lower ratings, as defined by international agencies that provide such ratings; these may pay higher rates of interest than bonds with higher ratings. The Fund is intended for investors who are willing to accept a high level of risk.

For full investment objective and policy details refer to the Prospectus.

## Important information

### Risk factors you should consider before investing:

- The value of shares and the income from them can go down as well as up and you may get back less than the amount invested.
- Investing globally can bring additional returns and diversify risk. However, currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
- Bonds are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond. Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell particular bonds at an anticipated price and/or in a timely manner.
